Dear Fatima Families,

According to asbestos regulations, we are required to notify you of all pertinent operations regarding our asbestos program. We have a current asbestos management plan on file in the school office. This plan is available for review during regular school office hours. We will be glad to answer any questions you may have about the asbestos program. Our primary focus is in protecting all building occupants from this hazardous substance. Our plan meets or exceeds federal and state asbestos regulations.

We do have asbestos in the glue under some of our floor tile. Staff members have been trained in the maintenance of the tile and we are in compliance with all regulations. We make periodic six-month inspections and the school has been examined by a certified asbestos inspector. Please feel free to stop by the school at any time to review our asbestos management plan or call for an appointment if you have a concern.

Yours in Christ,

Dr. Carynn Wiggins
Principal
